

Research Group	Research Lines	Planned Activities	Contact information
HUM-289-1	Social psychology of inequality. Psychosocial consequences of social class. Psychology of social change.	Laboratory and/or group meetings related to the lines of research mentioned. Getting first-hand experience of some of the research and methodologies.	Rosa Rodríguez Bailón rrbailon@ugr.es
HUM-289-2	Social psychology and gender. Sexism, myths and gender violence.	Laboratory and/or group meetings related to the lines of research mentioned. Getting first-hand experience of some of the research and methodologies.	Miguel Moya mmoya@ugr.es
HUM-957-1	Neuroimaging of brain cognitive function. Neural mechanisms of cognitive control and preparation. Multivariate analysis (MVPA, RSA) of neuroimaging data.	Reading, presentation and debate of scientific articles on the group's theme. Observation and participation in data collection in experiments in the field of Cognitive Neuroscience. Attendance to group meetings.	María Ruz mruz@ugr.es
HUM-379-1	Attention and Vigilance. Alertness and orientation in time, attentional orientating and cognitive control.	Reading, presentation and debate of scientific articles on the group's topics. Observation and participation in data collection in experiments in the field of Cognitive Neuroscience. Attendance to group meetings.	Juan Lupiáñez jlupiane@ugr.es
HUM-388	Loved Support Figures as a Means to Enhance Grief Exposure therapy in anxiety disorders: insights from learning by direct experience, by observation and through instructions.	Reading, presentation and discussion of articles relevant to the line of research. Attendance at the research group meetings. Observation and participation in data collection and statistical analyses of psychophysiological data.	Pedro Guerra pguerra@ugr.es
CTS-581	Effect of stress on neurodevelopment .Clinical neuropsychology applied to obesity. Clinical neuropsychology applied to gender violence.	Reading, presentation and debate of scientific articles related to the lines of the group. Observation and participation in the data collection of the studies that are being carried out at that moment	Miguel Pérez mperezg@ugr.es
CTS-261	Human Sexuality.	Collaboration in ongoing laboratory studies, experience with recording/assessing sexual arousal, and actively participating in group meetings.	Juan Carlos Sierra jcsierra@ugr.es
HUM-957-2	Brain and cognition in low and high activation states.	Reading, presentation and debate of scientific articles on the group's theme. Observation and participation in data collection in experiments in the field of Cognitive Neuroscience. Attendance to group meetings	Daniel Sanabria daniel@ugr.es
HUM-740	Neural bases of collaborative memory. Memory and learning processes in bilinguals. Common neural bases of creativity and memory.	Reading, presentation and debate of scientific articles on the group's theme. Observation and participation in data collection in experiments in the field of Cognitive Neuroscience. Attendance at group meetings.	Teresa Bajo mbajo@ugr.es
HUM-379-2	Developmental cognitive neuroscience. Early development of higher order mental processes (attention, consciousness, self-regulation, executive functions) and brain development.	Reading, presentation and debate of scientific articles on the group's theme. Observation and participation in data collection in experiments with children in the field of Cognitive Neuroscience of Development. Attendance at group meetings.	Charo Rueda rorueda@ugr.es
