We are looking for an Early Stage Career (PhD student) to perform research associated to the Spanish Ministry of Science Innovation and Universities project “\*Study of brain changes induced by non-invasive brain stimulation as predictors of future brain health status in older adults\*” which will combine the use of neuroimaging techniques (MRI), non-invasive brain stimulation and neuropsychological testing. The person will likely have to interact with the volunteers of the study and therefore Catalan/Spanish language proficiency is desirable.

Interested applicants please contact: [dbartres@ub.edu](mailto:dbartres@ub.edu) / <http://www.ub.edu/bbslab/>
