Lab Coordinator Position at the University of Notre Dame

13/03/2019

Empleo

Applicants should have interests in the cognitive neuroscience of human memory and cognitive aging, prior research experience, and have a bachelor's degree in psychology, neuroscience, or a related field. Individuals who will graduate by June 2019 with a bachelor's degree will also be considered. Prior programming experience (Matlab, Python) research experience with EEG, TMS, and fMRI is desirable, but is not required. This is a one-year position with the possibility of renewal for a second year.

The Memory, Aging, and Cognition laboratory at the University of Notre Dame seeks applicants for a laboratory coordinator. Our laboratory investigates the neural bases of episodic memory in healthy young and older adults using a variety of techniques, including electroencephalography (EEG), and transcranial magnetic stimulation (TMS). The lab coordinator will be responsible for day-to-day management tasks in the lab including scheduling and recruiting participants, training and supervising undergraduate research assistants, creating experimental and laboratory protocols and procedures, as well as data collection and analysis.

Applicants should have interests in the cognitive neuroscience of human memory and cognitive aging, prior research experience, and have a bachelor's degree in psychology, neuroscience, or a related field. Individuals who will graduate by June 2019 with a bachelor's degree will also be considered.
