Brain Products is hiring a new team member to expand its Strategic Marketing Team Place of employment: Gilching (near Munich), Germany Position: Scientific Consultant

Strategic marketing monitors the developments in science and develops strategies and solutions for our research field. We initiate cooperations and projects with scientific partners and companies.

Brain Products is hiring a new team member to expand its Support Team Place of employment: Gilching (near Munich), Germany Position: Scientific Consultant (Neuroscience research applications) (m/f)

BRAIN SIGNALS AS A PASSION:

Are you an expert in processing neurophysiological data of the human brain and have proven EEG experience in research settings? Are you familiar with human psychophysiology and EEG signal processing and are motivated to assist other researchers with their data analysis? Do you enjoy solving signal processing problems and are enthusiastic about contributing to EEG analysis software development? Then you could be the person we are looking for!

The Brain Products headquarters in Gilching (near Munich/Germany) needs your experience and creativity to strengthen the Scientific Support team. Brain Products is

the global player for a vast variety of scientific applications in the context of electroencephalography. Our acquisition software and innovative electrode concepts (active, dry, passive) are the work horses in the global brain research community, and our analysis software BrainVision Analyzer 2 is used by researchers worldwide for state-of-the-art signal processing

The Scientific Support team helps our end users in their pursuit of optimal data analysis. Many customers worldwide value the reliable advice provided to them to successfully process and study EEG signals in BrainVision Analyzer and to find optimal solutions for their research endeavours. The team currently includes PhDs with backgrounds in Physics, Biomedical Engineering, and Psychology or related fields. Solutions for our users are developed with a strong backup from our software development team. Brain Products is an owner-operated midsize company situated in the middle of the five lakes district and offers flat hierarchies, interdisciplinary teamwork, experienced supervision and permanent contracts.
